- Owner is home
- Owner is not home
- Soft surfaces
- Hard surfaces
- High surfaces
- Low surfaces

Number of cats in household: _____

Number of litterboxes in household: _____

Type of Litter: _____

FOR ALL PETS:

Before your appointment, we need you to obtain 2-4 videos of your pet's behavior issues to bring with you for submission of the consultation, as well as this completed form:

- a. At least one video should be of the pet's behavior when they are home, not necessarily performing the problem behavior. Include a video tour of the home environment.
- b. For feline behavioral periuria (Inappropriate urination, cat urinating outside of the litter box) cases, a video or picture of the litterboxes is necessary.
- c. At least one video of the problem behavior
- d. *Do not endanger people or animals in making videos.*

Other body systems (to be answered for all pets):

Changes in overall health have a major impact on behavioral clinical signs. Make sure to check all that apply and use the "other" field if necessary.

- Changes in appetite
- Weight loss
- Weight gain
- Muscle wasting
- Orthopedic pain
- Chronic otitis externa
- Chronic pyoderma
- Pruritus
- Neurologic pain
- Changes in defecation (diarrhea, constipation)
- Recurrent urinary tract infections
- Changes in urination (frequency, location, pain)
- The patient has none of the changes listed above
- Endocrine (diabetes, Cushing's, Addison's, hypothyroidism)
- Other: _____

Medical treatments:

Your patient's medical records including images/videos will be reviewed. Please list any medications or supplements that your pet is currently taking:

When treating veterinary behavior (psychiatric) cases, aggression is often a clinical sign. There is inherent liability in treating these cases. Your consultation is based on the information provided here and is not as complete as an appointment directly with a veterinary behaviorist. Take the time to read about the medications and treatments recommended so that you can make the best decisions for your pet with your veterinarian. Florida Veterinary Behavior Service and The Scottsdale Veterinary Clinic is not responsible for the outcomes of the cases for which they consult. Please read and sign to acknowledge that you understand and agree to the above statements.
