Client #: _____

Dental Extractions Authorization Form

Scottsdale Veterinary Clinic 7311 E. Thomas Road Scottsdale, AZ 85251

Client Name: _____ Patient Name: _____

Breed: _____ Age: _____ Color: _____ Sex: **Male Female**
Altered? Yes No

Phone number where I can be reached today 9am-9pm:

1. _____

2. _____

_____ 1. Please extract any teeth that are diseased. Extractions range in cost from \$68 to \$248 each.

I understand the cost for **full-mouth** extractions are:

\$1485.62 for cats

\$1812.02 for dogs weighing less than 35 pounds

\$2233.62 for dogs weighing greater than 35 pounds

(Extraction **does not** include the costs of: dental cleaning \$320, or any prescribed pain medications and antibiotics. These will be additional costs that I authorize)

_____ 2. Please extract teeth up to a budget of \$_____.

*I understand this budget may **not** cover expenses associated with all recommended extractions; I also understand that the cost of the dental cleaning \$320, prescribed pain medications and antibiotics must also be considered in addition to this budget given)*

Extractions range in cost from \$68 to \$248 each.

_____ 3. Please call me with an estimate prior to performing any extractions.

(I acknowledge that my pet will be under anesthesia during this phone call attempt.)

If I am unable to be reached, please:

_____ a.) Follow Instruction #1: extract as necessary

_____ b.) Follow Instruction #2: follow allotted budget, see above

_____ c.) Do not extract and wake my pet from anesthesia. *(If extractions are desired later I understand anesthesia will be required a second time incurring a second charge of \$492.62 for 1hr.)*

Please Initial:

Your pet's teeth are held in place by the periodontal ligament, and over time dental disease can cause this ligament to deteriorate. When the tartar is removed by scaling during the dental procedure, many times this then results in a tooth or multiple teeth falling out, especially in pets with higher grades of periodontal disease.

Please Initial:

A pre-operative blood panel will be performed before the dental procedure is started. If the bloodwork shows concerning abnormalities, we may choose to delay the dental procedure for the safety of your pet. Your veterinarian will determine a treatment plan, and will ensure to advise you on what your next steps may be. The cost of the pre-operative bloodwork is \$146.02, and the cost of a comprehensive examination is \$68.00, and would be due at time of pick up if the procedure is cancelled

Signature: _____ Date: _____

Please initial if you would like for your pet's teeth to be saved: _____
